## EXPERIENCE

### Full-Stack Developer

**Cognizant** Jul 2019 - Nov 2023

- Develop and maintain highquality web applications using both frontend and backend technologies
- Collaborate with a team of designers and developers to create userfriendly and visually appealing interfaces
- Design and implement efficient and scalable database structures
- Write clean and maintainable code following best practices and coding standards
- Perform regular testing and debugging to identify and fix any issues or bugs
- Ensure the security and integrity of the application through measures such as data encryption and user authentication
- Optimize the performance and efficiency of the application by identifying and resolving bottlenecks
- Stay updated with the latest web development trends and technologies to bring innovative solutions to the table
- Provide technical guidance and support to other team members when needed
- Participate in code reviews and provide constructive feedback to improve code quality
- Collaborate with stakeholders to gather requirements and understand business needs for specific projects or features
- Create technical documentation and user guides to assist users in understanding and utilizing the application effectively
- Assist in deploying and maintaining applications on web servers and cloud platforms
- Monitor and analyze application performance metrics to identify areas for improvement and implement necessary changes
- Troubleshoot and resolve any production issues or customerreported bugs in a timely manner.

### Front-end Developer

**IBM** Jan 2015 - Nov 2018

- Developed and maintained responsive websites and web applications using HTML, CSS, and JavaScript.
